Highlights

- Skilled Data Scientist and ML developer having 5+ years of experience in designing and developing end-to-end ML and data pipelines.
- Demonstrated strong teamwork, representation, and leadership by collaborating with diverse individuals, eagerly tackling new challenges and adapting flexibly to evolving project demands.

Experience

Spatial Data Analyst March 2025 – June 2025
CLIK - Connection Lab and Innovation Kitchen Turin, Italy
- Improving the map section of the PoliTo Student App by fixing bugs and applying innovative solutions

Software Technician and Database Manager Oct. 2020 – Jan. 2021
Ministry of Education Behshahr, Iran
- supporting and enhancing the technological infrastructure and data management systems critical to the educational sector.

Education

Master of Science | ***Data Science and Engineering*** Oct. 2023 – Present
Polytechnic University of Turin - (Website) Turin, Italy

Bachelor of Engineering | ***Computer Engineering, Software*** Sep. 2017 – Feb 2022
Mazandaran University of Science and Technology - (Website) Behshahr, Iran

Technical and Soft Skills

Languages: Persian (Native), English (B2), Italian (A2)
Programming: Python, R, Java, C++, SQL, JavaScript
NLP: NLTK, Spacy, Gensim, Hugging Face, Stanza
Databases: MySQL, MongoDB, PostgreSQL Microsoft SQL Server, SQLite
Libraries: Sklearn, Keras, Pytorch, PySpark, Tensorflow, Pandas, Numpy
Visualization: matplotlib, Plotly, ggplot2, Tableau, Microsoft Power BI, LIME, Streamlit
Tools and Frameworks: Hadoop, Spark, Azure ML Studio, Linux, Git, Google Earth Engine, Google Street View

Relevant Projects

Natural Language Queries for Egocentric Vision egocentric-vision.git
Polytechnic University of Turin

- This project enhances egocentric video understanding by improving VSLNet with EgoVLP features, BERT encoding, and pretraining on queries generated by Gemma-2b, achieving better localization of answers to natural language queries in the Ego4D NLQ benchmark.

ProMPT - Professional Modeling Prompting Tool ProMPT.git

Polytechnic University of Turin

- This study highlights the untapped potential of AI in post-conflict recovery and peacebuilding. It introduces a taxonomy of post-conflict issues, a tool that generates AI solution prompts and impact assessments, and evaluates the tool's effectiveness in improving decision-making through a real user study.

Polito Student Application polito-student-app.git

CLIK - Connection Lab and Innovation Kitchen

- Developing an innovative and user-friendly solution to resolve bugs and enhance the map functionality of the PoliTo Student Application, utilizing QGIS, PostgreSQL, and advanced routing algorithms for improved spatial data handling and navigation.

American College Admissions Analysis datamining-college.git

Mazandaran University of Science and Technology

- Developed and optimized statistical machine learning models to predict future college admissions, using R scripting language.

Sentiment Analysis sentiment-analysis.git

Polytechnic University of Turin

- Developed a sentiment analysis system for tweets using machine learning, focusing on classification models and feature extraction techniques. Found Logistic Regression with TF-IDF to be particularly effective. The project supports businesses in understanding user sentiments to guide decision-making based on social media data.

Patient Survival patient-survival.git

Polytechnic University of Turin

- Developed a machine learning model to predict the survival of critically ill patients. The model aims to assist healthcare providers in making informed decisions regarding patient management.

Particle Coordinates Analysis particle-coordinates.git

Polytechnic University of Turin

- Implemented an efficient method for accurately predicting two-dimensional spatial coordinates (X, Y) of particles based on signal features extracted from detector pads

International Community Engagement

Co-Facilitator November 2025

Synergy Youth NGO Yerevan, Armenia

- Designed and facilitated a 12-day youth exchange project for 30 high school students, utilizing non-formal learning techniques and nature-based workshops to foster resilience, emotional well-being, and inclusivity.

Participant November 2025

Udruzenje mladih "Logos" Rettenegg, Austria

- A 9-day training course focused on integrating sustainability into youth work. Engaged in non-formal learning modules on the circular economy and SDGs, collaborating with youth workers from 9 different countries.

Participant October 2025

Associazione Caleidoscopio Paola, Italy

- An 8-day youth exchange project promoting social inclusion across Italy, France, Belgium, and Greece. Collaborated with 33 peers to bridge cultural gaps through artistic workshops (dance, video-making) and non-formal education, culminating in the co-creation of a public Intercultural Festival.

Participant September 2025

Estacion Esperanza Caldirola, Italy

- a 10-day international youth exchange involving participants from 6 countries (Italy, Spain, Hungary, Romania, Ukraine, Armenia). Explored the intersection of mental well-being and environmental ethics through outdoor education and workshops on sustainable food systems and ethical consumption.

Participant September 2025

Protect Work Organization Tale, Slovakia

- A 9-day training course enhancing youth workers' skills in participation, policy, and engagement, using tools like the Ladder of Participation, 5 Steps to Municipality, SWOT analysis, and the Democracy Reloading Toolkit to foster cooperation and innovation in youth work.

Participant July 2025

Nui APS Organization Pisa, Italy

- A 9-day youth exchange project using theater to explore European identity, diversity, and shared values, fostering dialogue, self-expression, and inclusion through collaborative performance.

Participant March 2025

Instytut Przeciwdzialania Chorobom Cywilizacyjnym Zakopane, Poland

- An 8-day youth exchange project to explore themes of tolerance, diversity, and discrimination in Europe. Through creative and non-formal methods, the project raised awareness, shared perspectives, and looked for inclusive solutions.

Participant February 2025

Forward4Future Vienna, Austria

- An 11-day training course equipped young people in disadvantaged areas with entrepreneurial skills, helping them create job opportunities and drive economic growth. Participants also gained access to EU funding programs to support their initiatives.

Participant December 2024

Vakıf Ay Dernegi Koceali, Turkey

- This 9-day youth exchange project equipped youth with skills in disaster preparedness, response, and resilience through workshops, discussions, and cultural exchange, fostering proactive leadership and stronger communities.

Participant November 2024

Platforma Integracji Młodziezy Poronin, Poland

- This 9-day youth exchange project helped improve work-life balance by providing practical strategies for managing stress and enhancing mental and physical health. It offered engaging tools to reduce overload and promote overall well-being.
